English (Intermediate)

Hindi (native)

About Me

I am Web developer with a solid educational foundation in B.Tech and a strong proficiency in a variety of web development technologies. I thrive on creating responsive and user-friendly web applications that not only look great but also function seamlessly , and also has some knowledge of React Native and Android development:

PROJECT :

Title: Note-Book App (MERN)

Description : This MERN application uses MongoDB, Express.js, React.js, and Node.js technologies for authentication and login. It uses JWT for authentication and allows users to save notes using their ID and password. The backend is developed using Express.js, while the frontend is created using React.js, a trending technology

Title: Portfolio (ReactJS)

Description : My portfolio showcases my proficiency in modern web development, showcasing my expertise in HTML, CSS, JavaScript and React Js. It features curated projects, seamless user interaction, and appealing interfaces, showcasing my commitment to excellence and staying ahead of web development trends.

Title: PDF_Merger (ExpressJS)

Description : PDF Merger is a powerful tool designed to seamlessly merge two PDF files into one. With the aid of our strong Express.js backend, this application offers a reliable and efficient solution for combining PDF documents.

Title: News App (ReactJS)

Description : News application uses a dynamic API to provide real-time updates and information from around the world. It integrates React technology for an intuitive and seamless user experience. The app offers a wide range of news articles, tailored to users' interests and preferences. The React-powered app provides relevant and accessible information.
